EXPERIENCE

Entera, Columbus, OH — Senior Front End Developer

JANUARY 2022 - PRESENT

Migrate class-based React application to use functional approach. Optimize components to prevent unnecessary renders. Establish Design Operations as a cross-functional team constructing design system standards for Figma user interface mockups as well as the resulting HTML, CSS, and Javascript code implementation. Produce and iterate on wireframes and user flows for proposed product features.

Zipari, Brooklyn, NY + Columbus, OH — Technical Architect

DECEMBER 2019 - NOVEMBER 2021

Architect application structure to ensure scalability of front end codebase and user experience design. Deliver set of tools to allow for the configuration, theming, and user segmentation of multiple web products, for use by multiple clients. Lead migration from Angular to React and from REST to GraphQL.

Zipari, Brooklyn, NY — Technical Director

JANUARY 2019 - NOVEMBER 2019

Organize cross-functional teams for each product to enable more efficient delivery schedules. Introduce and implement a front end state management system. Establish a “core” team to build reusable components and internal configuration tools.

Zipari, Brooklyn, NY — UX Engineering Manager

MARCH 2018 - DECEMBER 2018

Engineer theming system to deliver configurable and customizable user interfaces for multiple customers with multiple products. Establish code standards for HTML and SCSS. Introduce CSS Custom Properties to handle theming at runtime.

Kargo, New York, NY — Senior UX Engineer

SEPTEMBER 2015 - FEBRUARY 2018

Operate at the intersection of product, design, and engineering to facilitate rapid, iterative assembly of product features. Develop pattern libraries and implement a cross-product design system.

EDUCATION

The Ohio State University, Columbus, OH — Economics

JUNE 2009 - JANUARY 2012

Critically analyze how individuals, firms, governments, and international agencies allocate finite resources in the face of limitless human desire.
